Employment Goal

Employment with a company where I can use my artistic and people skills to advance ideas, sell products or solve problems.

Art Bio

My hopes and dreams are reflected through my extensive interests. Science and nature have been primary to my artistic career. I want to explore and document natural life through art to produce solutions to environmental and other problems. I also want to provide awareness for those who are unaware and provide visual and coherent information for those who are. My art reflects these goals.
